Bringing Together the Best of Global Academia and Industry

Dear Delegates & Colleagues,

It is our pleasure to welcome you to AI in Healthcare 2.0, a conference focused on **“Powering Precision & Personalizing Care”** through Artificial Intelligence.

Healthcare is entering a new era where Artificial Intelligence is enabling more accurate diagnoses, targeted therapies, smarter workflows, and truly patient-centered care. From genomics and digital pathology to robotic surgery and predictive analytics, AI is helping transform healthcare from generalized treatment to precision medicine tailored for every individual. As clinicians, researchers, and innovators, we have a unique opportunity to harness these technologies to make healthcare more intelligent, efficient, and compassionate.

At Yashoda Hospitals, **we believe technology should strengthen, not replace the human touch in medicine.** Our goal is to combine innovation with compassion to deliver care that is more precise, accessible, and impactful. As we embrace innovation, we must ensure that technology remains ethical, inclusive, and centered on humanity. Precision medicine is ultimately about delivering the right care to the right patient at the right time.

This conference brings together leaders from healthcare, academia, startups, and industry to exchange ideas, foster collaboration, and explore real-world AI applications that can redefine patient care.

Thank you for being part of this international AI in Healthcare initiative.

Wishing you a productive and enriching conference.

Dear Friends & Colleagues,

It is a distinct honor to welcome you to **AI in Healthcare 2.0**, hosted at Yashoda Hospitals, Hitec City. Under the theme “**Powering Precision & Personalizing Care**,” this gathering marks a defining moment in medicine. Artificial Intelligence has shifted from a future promise to a present reality, fundamentally reshaping the landscape of patient care.

Healthcare is entering a new era. From **Genomics** and **Digital Pathology** to **Robotic Surgery** and **Predictive Analytics**, AI is fundamentally shifting our approach from generalized treatments to **Precision Medicine** tailored for the individual. As clinicians and innovators, we have a unique responsibility to harness these technologies to make medicine more intelligent, efficient, and deeply compassionate.

This year, our conference is structured across **12 key dimensions** designed to explore the full spectrum of AI integration:

- **Precision & Discovery:** Dedicated tracks in the Precision Hall and Discovery Hall focusing on personalized medicine and advanced drug development.
- **Practical Innovation & Code:** Hands-on learning in the Innovation Hall (Clinical AI Build Lab), the Google Workspace Clinical AI Build Lab, and the immersive Code to Clinic session at THub.
- **Specialized Workshops:** Advanced, deep-dive sessions focusing on AI in Radiology and AI Digital Pathology.
- **The Entrepreneurial Ecosystem:** Two premier Startup Innovation Challenges driven in partnership with RICH and FABa, alongside a cutting-edge Healthcare Expo.
- **Strategic Governance & Media:** High-level leadership dialogue at The Policy Pavilion to ensure technology remains ethical and inclusive, complemented by insights from our Media Hall.

At Yashoda Hospitals, **our guiding philosophy is that technology must elevate, never replace, the human touch**. Precision medicine is ultimately about delivering the right care to the right patient at the exact right time.

By uniting the brightest minds from global academia and industry including esteemed partners like **Google, Microsoft, DeepMind, Gemini, Grace Cancer Foundation, RICH, FABa, WDC, ISB, IIT Hyderabad and IIITH**, we aim to foster collaborations that will redefine patient outcomes worldwide.

We wish you an inspiring, transformative, and meaningful conference experience
