FOR PHYSICAL THERAPIST**

**ONCOLOGY**

# **LYMPHEDEMA**

**MANAGEMENT**

Dear Physios,

We cordially invite you to attend the Hands-on Workshop on Oncology Lymphedema Management: Practical Bandaging Skills for Physical Therapist. This hands-on workshop is for Physiotherapy Professionals to enhance their Clinical Skills in the management of Lymphedema.

Lymphedema is an accumulation of protein-rich fluid in the superficial tissues and is a very common and serious condition worldwide. It has important pathological and clinical consequences for the patient, if left untreated.

Lymphedema bandaging involves applying multi-layered compression bandages to reduce swelling and improve lymphatic drainage. Each participant will learn about Lymphedema bandaging techniques for the upper and lower extremities to use in their daily practice of treating oncology patients. It will enhance their patient experience and outcomes in many conditions.

Best Regards,

**Dr. Pavan Gorukanti, MD**  
Pulmonary & Critical Care (ABIM),  
Director - Yashoda Hospitals

**K. Srinivas Reddy**  
Chief Operating Officer  
Yashoda Hospitals, Malakpet
